

**Treasure State Honey** is a small family-owned apiary specializing in raw, unfiltered honey. Our bees forage along the Sun River in Central Montana

## Montana Wild Crafted Honey

## RAW

Excessive heating destroys the beneficial enzymes and antioxidants in honey. We are careful to ensure that our honey is processed at a low temperature in order to preserve its natural goodness.

## UNFILTERED

Treasure State Honey contains traces of pollen, propolis, and bees-wax which contribute to its unique flavor. Pollen and propolis may provide added health benefits.

## NATURAL

Excessive heating destroys the beneficial enzymes and antioxidants in honey. We are careful to ensure that our honey is processed at a low temperature in order to preserve its natural goodness.

**This River** was known as the Medicine River by the Blackfeet when Lewis and Clark traveled through the region. Famous western artist Charles M. Russell used this land as the setting for many of his paintings.

**The flower** sources for Treasure State Honey are wild sweet clover, alfalfa, and numerous Montana wild flowers.
